Event website: (include http://)

Cultural Tourism (CT) events on OrlandoAtPlay.com (OAP)

For all proposed CT events (as well as previously granted events) to show up in OAP search for OCACA events, you MUST code the event posting.

How to code a CT event:

From Step 2 entering or editing the Event Description & Type, in EITHER **Primary event type**, or in **Additional event type**, you must use the dropdown option and choose OCACA.

That will code the event, so that it will be included when using the Search option (below).

How to view the CT events:

At right, under Find an Event, click on "Advanced Search" (above the date range), and in the search fields on the left side, under Category: use drop down to select OCACA. Enter any other search criteria, and press red button "Search" at the bottom.

If you have an event that is already posted, but have not added this category (and it IS a CT event), you can edit this yourself on your OAP account. It will automatically send an update to William to check and re-post.

For any questions on posting events or related to OAP, please contact William Morris at William@UnitedArts.cc
